Your input on the recommended clean-up plan for the Master Metals Site is important to U.S. EPA. Comments provided by the public are valuable in helping U.S. EPA select a final clean-up plan for the site.

You may use the space below to write your comments. You may hand this in at the March 18, 1999 public meeting or fold and mail to the address for Bri Bill on the back page of this fact sheet. Comments must be postmarked no later than March 31. If you have any questions, please contact Bri Bill at (312) 353-6646, or toll-free at 1-800-621-8431. Comments may also be faxed to Bri at (312) 353-1155 or sent via email to: [bill.briana@epa.gov](mailto:bill.briana@epa.gov)

✓ ① I believe the alternatives for clean-up are complex and the comment period of 1 month is too short for community to obtain adequate info. to give their opinion.

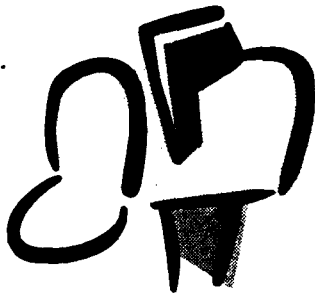

② Has EPA had significant experience w/ the 2 caps (clay vs asphalt)? If so they should provide info on the experience, effectiveness of the 2 caps at other superfund sites.

My concern is for both the health of the people and neighborhood. We should make certain that maintenance is adequate and that vegetation does not damage the cap.

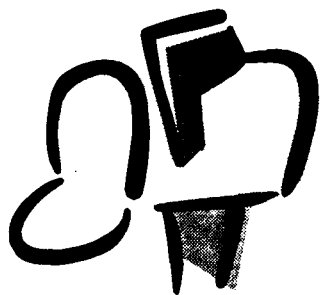

We might go with #2 if this does not preclude industrial development.

→ We must keep future use in mind and not do anything that precludes industrial development.

Our area needs both a good healthy environment & a economically viable environment.

Residents need to know how to get in touch with responsible staff at the Federal & state level to monitor progress.
